DETAILED ACTION

Response to Amendment

- 1. This Office action is in response to the amendment dated May 24, 2004. Claim 5 was amended. Claims 6 and 7 were added. Claims 5-7 are pending.
- 2. The rejection of claim 5 under 35 USC 112, first paragraph, set forth in paragraph 3 of the Office action mailed February 18, 2004 is withdrawn due to the amendment.
- 3. The rejection of claim 5 under 35 USC 112, second paragraph, set forth in paragraph 5 of the Office action mailed February 18, 2004 is withdrawn due to the amendment.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cliffe (GB 2147542). Cliffe teaches printed articles (see abstract). In the Figure 2 embodiment, glow material 11 per the "instant luminescent material" is covered by layer 15 which may comprise a translucent pigment effecting normal coloring per the instant "filter material" (see page 1, lines 114-125). Layer 15 may have any desired appearance or a pattern or message different from the printing of layer 11 per the instant "image" (see page 1, lines 126-129). Although Cliffe does not expressly say that the translucent pigment of layer 15 affecting the color may be towards a white color, it would have been obvious to one of ordinary skill in the art at the time of the

Application/Control Number: 10/663,467

Art Unit: 1774

invention to have selected white color based on the teachings of Cliffe, because Cliffe teaches any color desired may be selected.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cliffe (GB 2147542) in view of Bernhard et al. (US 3,874,890). Cliffe teaches printed articles (see abstract). In the Figure 2 embodiment, glow material 11 (per the instant luminescent material) is covered by layer 15 which may comprise a translucent pigment effecting normal coloring per the instant "filter material" (see page 1, lines 114-125). Layer 15 may have any desired appearance or a pattern or message different from the printing or layer 11 per the instant "image" (see page 1, lines 126-129). Cliffe fails to teach a specific translucent pigment for layer 15. Bernhard et al. (US 3,874,890) teaches titanium dioxide is a translucent pigment (see col. 4, lines 53-59). It would have been obvious to one of ordinary skill in the art at the time of the invention to have selected titanium dioxide as the translucent pigment for layer 15 taught by Cliffe, because Cliffe teaches a translucent pigment is desired for the layer and Bernhard et al. teaches that titanium dioxide is a known translucent pigment.

Allowable Subject Matter

7. Claim 5 is allowed. The closest prior art is considered to be Cliffe (GB 2 147 542), discussed herein. Cliffe teaches a glow material 11 overprinted with a translucent pigment containing layer to affect the color of the glow material (see page 1, lines 114-129); however, Cliffe fails to teach a filtering material for scattering light toward a white color comprising air bubbles.

Response to Arguments

8. Applicant's arguments with respect to claims 5-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dawn Garrett whose telephone number is 571-272-1523. The examiner can normally be reached Monday through Friday during normal business hours. Please allow the examiner twenty-four hours to return your call.

If reasonable attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye, can be reached at 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
